Expert Session on "Cyber Security and Digital Forensic"

Date: 14th March 2022

Venue: Visveshwarya Hall, ICEM

Dept.: Computer Engineering

Event Name: Cyber Security and Digital Forensic

Program Details:

Cyber security is the practice of defending computers, servers, mobile devices, electronic systems, networks, and data from malicious attacks.

On 14th March 2022, the expert session on "Cyber Security and Digital Forensic" was organized by Computer Engineering Department at ICEM. Keynote speaker was Mr. Nikhil S. Mahadeshwar Cyber Secured India, Mumbai India. Around 150 students were registered including second year and third year of Computer Engineering. Mr. Nikhil guided students and faculty members about how to secure mobile phones data, mail ID's and bank account very nicely. He also explained various methods of career options in cyber security and digital forensic. Cyber security tools help enterprises protect their devices, data, and user landscapes from internal and external threats. He shared open access tools of cyber security like Alien Vault, Comodo OpenEDR, Kali Linux etc. Mr. Nikhil shared different real examples related to cyber security and digital forensic. He also discussed the cyber challenges faced by our country.

The session was over with by signing on MoU by both the parties. The program was well coordinated by Dr. Soumitra Das (HOD Comp. Engg.), Dr. Poorna Shankar (Dean R&D) and Mrs. Pooja Sharma (Comp. Engg.)
