

2.5.1. Mechanism of internal assessment is transparent and robust in terms of frequency and mode

The Institute has developed a transparent and robust mechanism of internal assessment. The mechanism adopted for internal assessment ensures transparency by Continuous Assessment process.

The assessment is done in the form of Unit-wise assignment and Unit test, Practical assessment, Seminar and Project Review.

The institute closely monitors the performance of students at regular intervals in various modes. Institute calendar consists of the schedule of all unit tests/practice test/internal test and reflected in Department planned. Setting of the question paper and the results will be available to the students by concerned staff in class. Assessment of activities like seminars, projects, along with internal expert review brings transparency. Continuous Assessment for PG students is done by adhering to assessment methods such as internship related seminar/project. The expected level of the outcome is specified and declared to the assessor which helps the assessor to set the assignment accordingly.

The robustness of mechanism reflects in consistently good final year results. Institute recognizes the potential and barriers of the learner in terms of expressing their strengths and learning achievements. Thus, variety of tools as mentioned above is employed for assessment.
