

2.3.2. Teachers use ICT enabled tools for effective teaching-learning process.

Teachers of the ICEM try to make the best use of the technology in their teaching learning process. ICT has enabled better and swifter communication, presentation of ideas in an effective and relevant way. It is an effective tool for acquiring information from multiple sources to help students to enhance their knowledge database.

The College has a Wi-Fi Enabled Campus which helps the teachers and students to stay connected to the internet and learn and teach the updated information. The college has an Automated Library and lecture recording room for betterment in Learning experience for the learners. The college has well equipped Computer Labs with updated versions of software's like C, C++ Python, R, JAVA, Microsoft Office, as per the need of curriculum.

Teachers make and present PowerPoint presentations, videos in the classrooms which help them have an interactive conversation with the students. Teachers have started taking lectures online on Google Meet, Zoom, Microsoft Teams, etc. FDPs are conducted to enable/familiarize the teachers with these online platforms. Besides using the e-books in the e-classrooms, educational videos, such as Ted Talks, YouTube Content, etc. which further adds quality to lecture delivery. Teachers share reading materials, short notes, e-books over different media like Google Classroom, Microsoft Meet, E-Mail, College Portal, What's-App, One drive, Notebook, etc.

Dear all

Today's Class assignment activity of BRM subject .

LinkedIn certificate assignment activity
time : one hour

Topic: Creating a business Plan Business
Developemnt: Strategic Planning

After completion of certificate kindly submit
hardcopy to me or Akshay sir and upload in
LinkedIn certificate folder .

Please note that it would be considered for
your internal marks

ICT Tools usage Report

ICT tools used in classroom teaching which helps teachers to integrate in their subject, for teaching-learning and assessment. There are numerous subjects, for which we can use no cost ICT tools available on online and offline platforms for teaching, learning and assessment.

The Department of Mechanical Engineering used different ICT Tools in the teaching learning process in AY 22-23. Faculty conducted lectures using PPT's. Our faculties used expert YouTube videos for solving different assignments. We used to excel to maintain attendance of students and also used for maintaining their continuous evaluation. We carried out academic monitoring. We conducted students training for different software's like CATIA, ANSYS.

DEPARTMENT OF CIVIL ENGINEERING

Report on Usage of ICT Tools

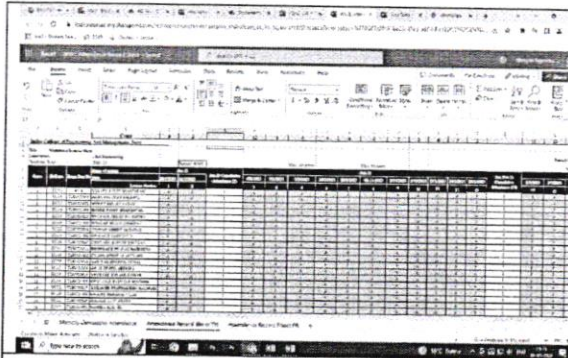

ICT tools are devices or objects used in information and communication technology e.g.: - computers, cell phones, video conferencing software, radio, television, laptop etc. During this digital era, it has become very evident that ICT tools can enhance teaching and learning process. ICT tools help in transforming teaching and learning process from teacher oriented to student-centered. Students these days are very handy with several ICT tools such as laptops, tablets, i-pads, smartphones etc. hence utilizing this resource in teaching and learning process has become a necessity.

We the Department of Civil Engineering, utilize different ICT tools in teaching and learning process. We execute our most of our theoretical lectures on projectors using PowerPoint presentations, maintain attendance using Microsoft Excel. We also monitor student's continuous progress through Microsoft Excel.

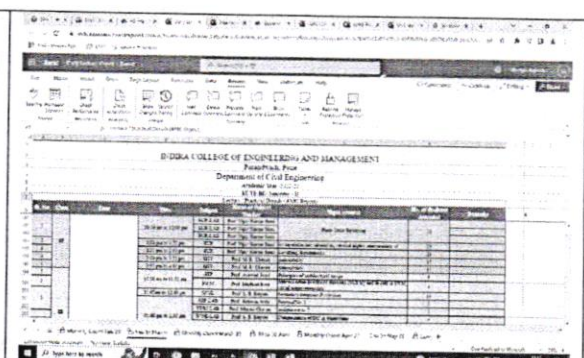

In addition to this our faculties have also started utilizing platforms like YouTube and Microsoft Stream to make their video lectures available 24x7. Our department has MoU with i-NODE Software Company which provides a government approved software for designing of Water Treatment Plant to the students. We also utilize several other designing software like Auto CAD, STAAD PRO, and Revit etc. which helps our students to be industry ready. Along with notes we also provide PPT, informative and related video links to students.

Cloud storage is the best option to store, manage and share data remotely and we take its advantage to the fullest. All the departmental documents are being digitized and stored on one drive. Photos, Videos and other files are also stored on shared drive so all faculties can manage and access them irrespective of their location. Our Institute also promotes use of ERP for paperless office work.

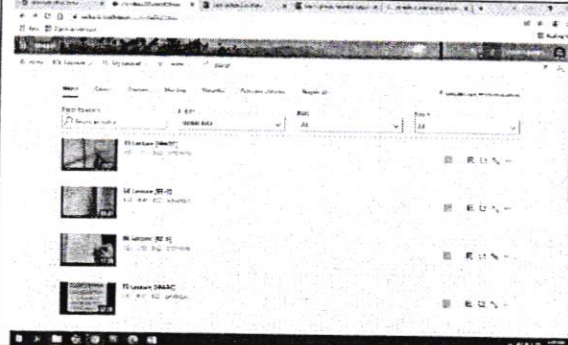

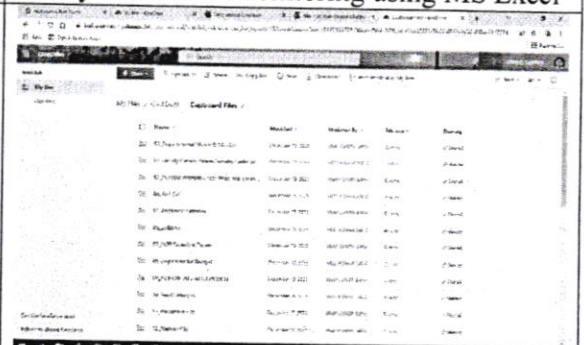

Attendance analysis using MS Excel

Daily Academic Monitoring using MS Excel

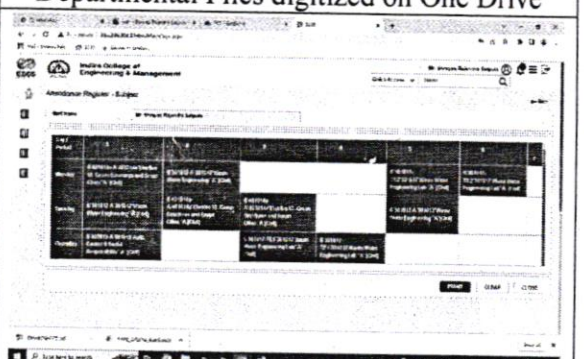

Video Lectures available 24x7 on MS Stream

Departmental Files digitized on One Drive

Sharing Informative Lab videos from experts

Use of ERP for attendance and academic monitoring

Sample YouTube / MS Streams Video Lectures by Faculties:

One Page Report on “Git & GitHub”

Date: 4th September 2023

Venue: LinkedIn Online

Certification Details:

Version Control lets us manage changes you've made to files over time, and is an essential skill for developers to master. Git is by far the most popular version control system on the web. In this fast-paced course, Ray Villalobos shows you the fundamental commands that we need to work with most Git projects. He explains how to use checkpoints called commits, which let us leave messages documenting what happened at each checkpoint, as well as how to create branches that are alternate versions of your project that we can work on without changing the original. Plus, it shows how to work with the popular GitHub website to explore existing projects, clone them to our local hard drive, and use them as templates for our new projects.

Skills covered

- Git
