Report on 30 Hrs "MERN Stack Development"

Date: 11/09/2023 to 15/09/2023

Participants: SYMCA students

Venue: SYMCA Classroom

Trainer: Mr. Harsh Sareen ,Freelancer Trainer

Brief Description:

The MERN Stack Development Certification Program for SY MCA students was conducted in the MCA Department from 11/09/2023 to 15/09/2023. The program aimed to provide students with in-depth knowledge and practical experience in various Full Stack Development topics.

Throughout the five sessions, the students were exposed to essential of full stack development. Each session included both theoretical explanations and hands-on exercises to reinforce learning.

Which also covers the following topics in details with hands on training

1. Introduction of Fullstack process and Brief of HTML,CSS,JS
2. Reactjs(SETUP OF REACTJS,JSX,LIFE CYCLE OF REACTJS,HOOKS,AXIOS)
3. Nodejs(http,express,socket I,o,pm2)
4. Nosql Database(Mongodb, connectivity with nodejs,mongoose, command how its works with nodejs)
5. Scratch to end spotify project

Finally, the students learned about the MERN Stack Development using above topics and a small project is assigned to them.

The students actively participated in the sessions, and their progress was assessed through

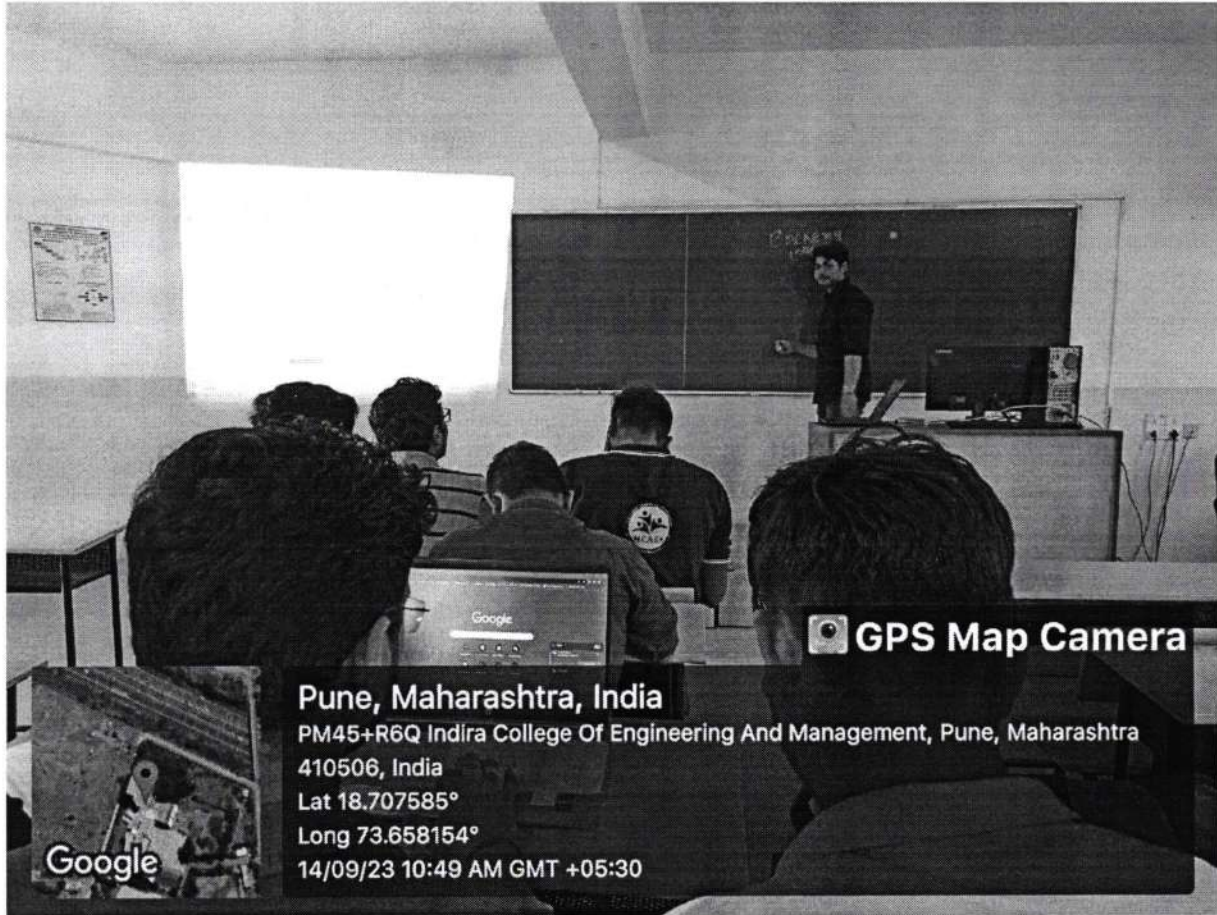

SHREE CHANAKYA EDUCATION SOCIETY'S

INDIRA COLLEGE OF ENGINEERING AND MANAGEMENT

Approved By AICTE New Delhi, DTE (MS) and Affiliated to Pune University (Id-No. PU/PN/Engg/282/2007)

Practical assignments and quizzes. At the end of the program, each student received a certification of completion, acknowledging their dedication and successful completion of the MERN Stack Development Certification Program.

Introduction to Training Topics

Welcome to our upcoming training program, where we will embark on an exciting journey into the world of Civil Engineering and the powerful tools it encompasses. Over the course of four intensive days, we will dive deep into key topics designed to equip you with practical knowledge and skills that are essential in today's dynamic Civil Engineering landscape.

By the end of these Five days(30 Hr), Students not only have gained a profound understanding of these crucial topics but also practical skills that can propel your career in Civil Engineering forward. We encourage active participation, open dialogue, and hands-on learning throughout the program.

So, let's embark on this knowledge-packed journey together. Get ready to explore, learn, and grow as we dive into the world of Civil Engineering, BIM, Revit, and the exciting possibilities of Artificial Intelligence. Let's make the most of this opportunity to enhance our skills and stay at the forefront of innovation in the industry.

Technical Week		
Course Content		
Days	Topics	Hrs
Day 1	Mindset of civil student and Industry requirement	6
	Overview of Building Information Modeling (BIM) and its importance	
	Overview of Revit and its benefits Test 1	
	Artificial intelligence & Civil Industry	
	Basics of Revit	
	Understanding the Interface	
	Navigating the Revit interface, including the Ribbon, Properties panel, and Project browser	
	Customizing the interface and general options, Navigation, Zooming, panning, and rotating the view"	

Day 2	Project 1: Simple House	6
	Setting up a project	
	Creating levels and walls	
	Selecting objects and using filters	
	Adding floors, doors, windows,	
Day 3	adding components	6
	Adding families downloading families	
	stairs, and railing	
Day 4	Section	6
	Camera	
	walkthrough	
Day 5	Rendering	6
	Sheets	
	LinkedIn profile with respect to Civil Engineer	
	Role Artificial intelligence in Civil Engineering and how to Prepre for new era of A.I. as a Civil Engineer	
	Test	

**Civil Department
2023-24**

Revit Structure Syllabus

Duration: (30 hours)

Unit 1:

Hours: 05

- 1. New Features**
 - a. New Features
- 2. New Features for Revit Structure**
 - a. Introduction to Autodesk Revit Structure
 - b. Basic Concepts and Principles
 - c. The Revit Structure User Interface
 - d. Building Information Modeling and Revit Structure, Getting Help
- 3. Getting Started with a Structural Project**
 - a. Starting a New Structural Project
 - b. Snaps Tool, Opening, Saving and Closing a Project
 - c. Options Dialog Box
- 4. Setting up a Structural Project**
 - a. Creating Project Templates
 - b. Using Levels
 - c. Using Grids
 - d. Working with Reference Planes

Unit: 2

Hours: 05

- 1. Structural Columns and Walls**
 - a. Structural Columns
 - b. Structural Walls
- 2. Foundations, Beams, Floors, and Open Web Joists**
 - a. Understanding Foundations
 - b. Adding Foundations
 - c. Structural Floors
 - d. Beams and Open Web Joists
- 3. Editing Tools**
 - a. Creating Selection Sets
 - b. Moving and Copying
 - c. Rotating, Mirroring and Arraying
 - d. Additional Editing Tools, Creating Groups
- 4. Documenting Models and Creating Families**
 - a. Dimensioning
 - b. Adding Text and Tags
 - c. Creating Families
- 5. Standard Views, Details, and Schedules**
 - a. Standard Views
 - b. Callout Views

Civil Department
2023-24

- c. Drafting Details
- d. Graphical Column Schedules

Unit 3:

Hours: 05

- 1. 3D Views, Sheets, Analysis, Reinforcements, and Massing**
 - a. 3D Views, Generating Shadows and Solar Studies
 - b. Working with Sheets
 - c. Understanding the Analytical Model
 - d. Working with Analytical Models
 - e. Adding Reinforcements, Linking Building Models
 - f. Introducing Massing
 - g. Editing Massing Geometry
 - h. Creating Building Elements from Massing Geometry
- 2. Linking Revit Models with Robot Structural Analysis**
 - a. Linking Revit Models with Robot Structural Analysis
- 3. Setting Up The Revit Structure Interface**
 - a. Revit Structure 2015 Interface
 - b. Setting up Revit Structure File Locations
- 4. Family Concepts and Techniques**
 - a. Family Types
 - b. Adding to the Family
- 5. Creating Custom Families**
 - a. Creating a Composite Metal Deck Family
 - b. Creating a Tapered Concrete Column Family

Unit 4:

Hours: 05

- 1. Creating Structural Walls and Floors**
 - a. Architectural Walls and Structural Walls
 - b. Structural Floor Placement and Options
 - c. Using Structural Beam Systems
- 2. Creating Foundations**
 - a. Isolated and Wall Foundations
 - b. Slab and Floor Slab Foundations
- 3. Reinforcement**
 - a. Rebar and Fabric Settings
 - b. Reinforcement Settings

INDIRA COLLEGE OF ENGINEERING AND MANAGEMENT
Approved By AICTE New Delhi, DTE (MS) and Affiliated to Pune University

Civil Department
2023-24

4. Structural Column Families

- a. Setting Up a Structural Column Family
- b. Inventor

Unit: 5

Hours: 05

1. Creating Specific Family Types

- a. Typical Concrete Corbelling Profile
- b. Typical Annotation Arrow Symbol

2. Structural Analysis

- a. Preparing Projects for Structural Analysis
- b. Creating Analytical Views

3. Project Team Collaboration

- a. Introduction to Worksets
- b. Working with Worksets

Unit 6:

Live Project

Hours: 05

Prof. Vishal Chaugule
Student Training coordinator

Prof. Sachin Ingle
Academic Coordinator

Prof. Savita Jangle
I/C HOD

Civil Department
2023-24

ETABS Syllabus

Duration: (30 hours)

S N	Topic Covered	Contact Hours
1	Introduction History and Advantages of ETABS, What ETABS Can Do!, An Integrated Approach, Modeling Features, Analysis Features, Design Features, Detailing Features	6 Hrs
2	The ETABS System Overview of the Modeling Process, Physical Modeling Terminology, Story Definition, Towers, Units, Coordinate Systems and Grids, Structural Objects, Groups, Properties, Nonlinear Hinges, Load Patterns, Vertical Loads, Temperature Loads, Automated Lateral Loads, Functions P-Delta, Modal Cases, Load Cases, Load Combinations, Design Settings, Detailing ,Output and Display Options	9 Hrs
3	ETABS Modeling Techniques Begin a New Model, Select the Base Units and Design Codes, Set up Grid Lines, Draw Grids, Define and edit Story Levels, Draw Dimension Lines, Draw Joint Objects, Save the Model Editing Properties Replicate, Extrude Joints to Frames, ExtrudeFrame to Shells, Merge Joints Align, Joints/Frames/Edges Move, Joints/Frames/Shells Edit Frames, Edit Shells, Edit the Model Geometry, View the Model Defining Properties Material Properties, Section Properties, Load Patterns, Mass source, Load Cases, Load Combinations, Draw Structural Objects Draw Beam/Column Objects, Draw Floor/Wall Objects, Assigning Properties- Assign Joint, Frame, Shell, Joint, Assign Loads to Frame Shell, Checking the model for any errors and eliminating if any	9 Hrs
4	ETABS Analysis Techniques Linear Static Analysis, P-Delta Analysis, Nonlinear Static Analysis, Modal Analysis, Mass Source, Response Spectrum Analysis, Linear Time History Analysis, Nonlinear Time History Analysis	6 Hrs

Date: 9th Sept 2023

Notice

All Students of BE are hereby informed that 30hrs Certification Course under VAC (Value Added Course) on Advanced Python is scheduled from 11th to 15th Sept 2023. Therefore, all should have to attend compulsory otherwise strict action will be taken if your attendance is not 100%.

The details are as follows.

Date: 11th to 15th September 2023

Time: 10:00 AM-5:00 PM

Mode: Offline

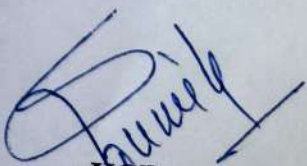

Venue: CKP hall, 4th Floor Computer Engineering

Note:

- Attendance is Compulsory otherwise Rs.500 should be fine per day.
- Uniform and ID Card is Mandatory.

VAP Coordinator
Prof. Reshma Kohad

HOD
Dr. Soumitra Das

Savitribai Phule Pune University
Third Year of Computer Engineering (2019 Course)
Value Addition Program

Teaching Scheme: Course: Advanced Python(TE)

Prerequisite Courses: basics python library and function knowledge is essential
basic understanding of data analysis is required

Course Objectives:

- To Explore the latest Visualization and data Manipulation Concept.
- To Familiarize with the core concepts of frontend and backend programming.
- To Explore the latest libraries using advance program.

Course Outcomes:

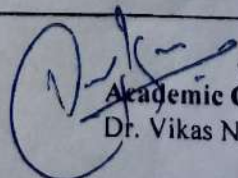

After learning the course, students will be able to:

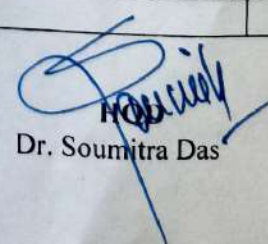

- Implement different Libraries for functions analyzing and manipulating.
- Explore the latest features of Numpy, Pandas & other Libraries.
- Implement data visualization and Module Building.

Detailed Syllabus

UNIT	Description	Duration (Hr)
I	Introduction to Python: Basics of Python, Installation Process , different Function, Overview of libraries, Standard Modules & Packages in python	06
II	Implementation of Seaborn Library Introduction of seaborn, Installation of seaborn library, overview of seaborn plotting function, seaborn object, properties. Styling and Themes in Seaborn Plotting chart using different function. Case study: Design plot graph of Height and Weight	08
III	Implementation of Numpy and Panda Library : Introduction of Numpy & Pandas Library, Installation Process, Handling Data Structure using Numpy, Data Frames Using Pandas Data Manipulation using Numpy and Pandas Case Study :	08
IV	Introduction of Scikit-learn and Matplotlib Library: <ul style="list-style-type: none"> • Overview of scikit Library, Installation of scikit, features of scikit, Model Processing, data representation, Implementation of Linear Modelling. Overview of Matplotlib Library, Installation of Matplotlib, Library, Plotting Section in Matplotlib. Implementation of Example using Matplotlib Library Case study: i) Estimate API using linear Regression ii) How to Plot List of X, Y Coordinates in Matplotlib	08

Event Report

Academic Year: 2023-24

Semester-I

Name of the event: Five days Workshop on "Learning Advance Python with Hands-on Practice"

Date and Time	11/09/2023 to 15/09/2023, 10.00 AM - 05.00 PM
Event Venue	Indira College of Engineering and Management, Parandwadi, Pune
Organized by	Department of Computer Engineering
Targeted Audience	T.E. Students of ICEM, Parandwadi, Pune
Resource Person	Prof. Tushar Kute, MITU Skillologies, Pune, India

Event Contents:

1. Understanding the concepts of Advance Python.
2. Hands-on practice on Advance Python.

Details of the event:

The Department of Computer Engineering of ICEM, Parandwadi, has organized a five days Workshop on "Learning Advance Python with Hands-on Practice" from 11th September 2023 to 15th September 2023 by inviting an eminent guest to deliver sessions on concepts of Advance Python.

The session speaker **Prof. Tushar Kute** had a nice talk on the basic understanding and the concepts of Data structures, Datasets, and programming with real time examples.

Day	Topics covered
Day 1	Python Basics and Data Structures Python syntax and essential concepts. Data structures: list, tuple, set, and dictionary. Introduction to linear algebra and linear regression.
Day 2	Numpy and Pandas

	In-depth study of Numpy for numerical computing. Comprehensive understanding of Pandas for data manipulation.
Day 3	Advanced Pandas Techniques Utilized Pandas for data appending, concatenation, merging, and joining. Explored string functions, data export, cleaning, and scaling.
Day 4	Data Visualization with Matplotlib Data visualization with Matplotlib. Various plots, including line plots.
Day 5	Tkinter, Machine Learning, and Regression Tkinter for building graphical user interfaces. Introduction to machine learning concepts. Classification, regression, and unsupervised learning. Regression Analysis Regression analysis as a statistical method for understanding relationships between variables. Importance of dependent and independent variables. Practical application of linear regression. Data preprocessing techniques like feature scaling and cleaning. Basics of classification algorithms. Introduction to unsupervised learning and clustering.

He had a very interactive session with the students and it was an effective two-way communication of the speaker and the participants.

30 Hrs Technical Training

Syllabus AUTOCAD with GD&T

from 11th March to 15th March 2024

SR NO.	TOPIC	SUB TOPIC TO BE COVERED	DATE	TIME	BATCH	Hrs
1	Introduction to Engineering drawing and concept	concept of 2D and 3D drawing	11-03-2024	9:00AM to 5:00PM	SE Mech	6Hrs
2	Elements of Engineering Drawing	point				
		line				
		plane				
3	projection of	point				
		line				
		plane				
4	Plane and quadrant concept	arrangments of quadrants				
5	projection of	planer or lamina				
		solid objects				
6	Method of projections	First angle method of projection				
		third angle method of projection				
7	CO ORDINATE Systems	Co-ordinate system methods, Drawing Limits and Units set up in Autocad	12-03-2024	9:00AM	SE Mech	6Hrs
8	File save Management	Create .tmp file,save as .dwg file,dxf file and				
		creating Tamplate drawing from .dwg file				
9	LAYERS	basic draw tools and modify toolbar				
		Understanding the concept and				
		working with layers, Line type, line weight				
		creating drawing using Layer setting				
10	Draw toolbar	working with layers, Line type, line weight	13/03/2024	9:00AM to 5:00PM	SE Mech	6Hrs
11	Modify toolbar	Trim,extend,copy,offset,mirror,rotate,array,break commands with exercise				
12	Dimensioning	creating dimensions on drawing with exercise linear,align,radius, etc.	14/03/2024	9:00AM to 5:00PM	SE Mech	6Hrs
13	Variable radius curve and its practice with autocad	Practical application				
14	GD&T	Introductio to interchangeability				
		concept and deffn. In term GD&T				
		limits,fits,tolerance				
15	GD&T	concept of Geometric shapes and chakes	15/03/2024	9:00AM to 5:00PM	SE Mech	6Hrs
		parallality,perpendicularity,circularity,symetricity,position control frame				
		giving feature tolerance on drawing in autocd				
		exercise of one production drawing				
		post training cad test

CATIA V5 SYLLABUS

SR No	Module	Session	Contents	Conducted On
1	Introduction	1	CATIA as a CAD software :- Concept of Parametric Modeling, Feature Based Modeling, User Interface, Mouse operations, File types and Management, drawing profiles. Major user industries of Catia.	09-11-2023
2	Sketcher	2	Sketcher: Profile toolbar, operation (corner, chamfer, relimitations, transformations, project 3D element), constraints, types of constraints,	09-11-2023
3		3	Sketcher:- sketch tools, tools (Sketch sloving status, sketch analysis, output feature), visualization toolbar, user selection	09-11-2023
4		4	Modeling of Machined component, Material Addition and Removal (Pad, Pocket, Shaft, Groove), Sketch and Positioned Sketch, Types of Fillets, Types of Chamfer. Types of Hole.	09-11-2023
5		5	Modeling of Machined component - 2. Pattern (Rectangular, Circular, User), Thread/Tap, Datum Features (Plane, Axes, Points), Simple Draft. Frequently used commands for Machined components	09-11-2023
6		Modelling of Machined Component (Part Design)	6	Advance Design features :- Axis System, Types of draft, Shell, Stiffener, rib slot, Multisection solid, Removed multisection solid, Apply Material, Measure, Render.
7	7		Introduction To Multibody concept:- Copy Paste, Paste special, Insert body, Boolean Operations (Add, remove, Intersect), Transformation (Translation, Mirror, Scaling, Affinity).	09-12-2023

8		8	Multibody concept:- Standered example	09-12-2023
9			Negative body concept (Boolean Operations)	
10		9	Advance Features:- Parameters, Formula, Relations, Design Table.	09-12-2023
11				
12	Drafting	10	Introduction To Drafting & Detailing Theory:- (types Generative – Interactive), Initial Drafting setting, Sheet Background, Views (ortho, ISO), Dimensions (Types-Generate Dimension & Create Dimension).	14/9/2023
13		11	Views:- (Aux, Section, Details, Clipping, Broken), View properties, DATUMS & Tolerance	15/09/2023
14		12	Annotations:- GD & T, Symbols, Note, Leaders, Table, Symbols (Machining, Roughness, Welding, Custom), Dress-up Toolbar.	15/9/2023
15				
16				
17				
18	Surfacing	13	Surfacing Modeling based Plastic Component:- Environment, Tool bars, Surface Creation (Extrude, Revolve, Sphere, Cylinder), Surface Modification, Surface Editing (Trim, Split, Shape Fillet,	13/9/23
19		14	Surfacing:- Offset(All 3 types), Fill, Blend, Join, healing, Project-Combine.	13/9/23
20		15	Advanced Surfacing:- Adaptive Sweep, Sweep(ALL), Multisection Surface.	13/9/23
21	Wire-frame Modeling	16	Wire-frame Modeling:- Point, Line, Planes, Curves, Circle-Conic, STANDARD EXAMPLES. Use of wire frame modeling.	13/9/23
22	Sheet Metal	17	Modeling of Sheet Metal Component: - Revision of sheet metal uses and design features, Tool Bars, Initial Parameters, Wall, Wall on edge, Flange, Cutout, Fold / Unfold. - Bending Operations:- Bend, Bend from Flat, Corner Relief, Corner Chamfer, Extrusion, Sheet metal Drafting.	14/9/2023

23	Assembly & Mechanism	18	Introduction to Assembly:- Types of assembly approach, Types of Constrains and DOF, placement of components in the Assembly, Manipulating Components, BOTTOM UP Approach	13/9/23
24		19	TOP DOWN Approach:- Part, Product, Component, Space Analysis, Reuse Pattern, Save management.	13/9/23
25		20	Assembly Drafting:- Scene(Exploded View), Bill of material, Ballon creation, Graph Tree Reordering.	13/9/23
26	TEST	21	Test Exam and Doubt clear sesseion	15/9/2023

Details of the Session:

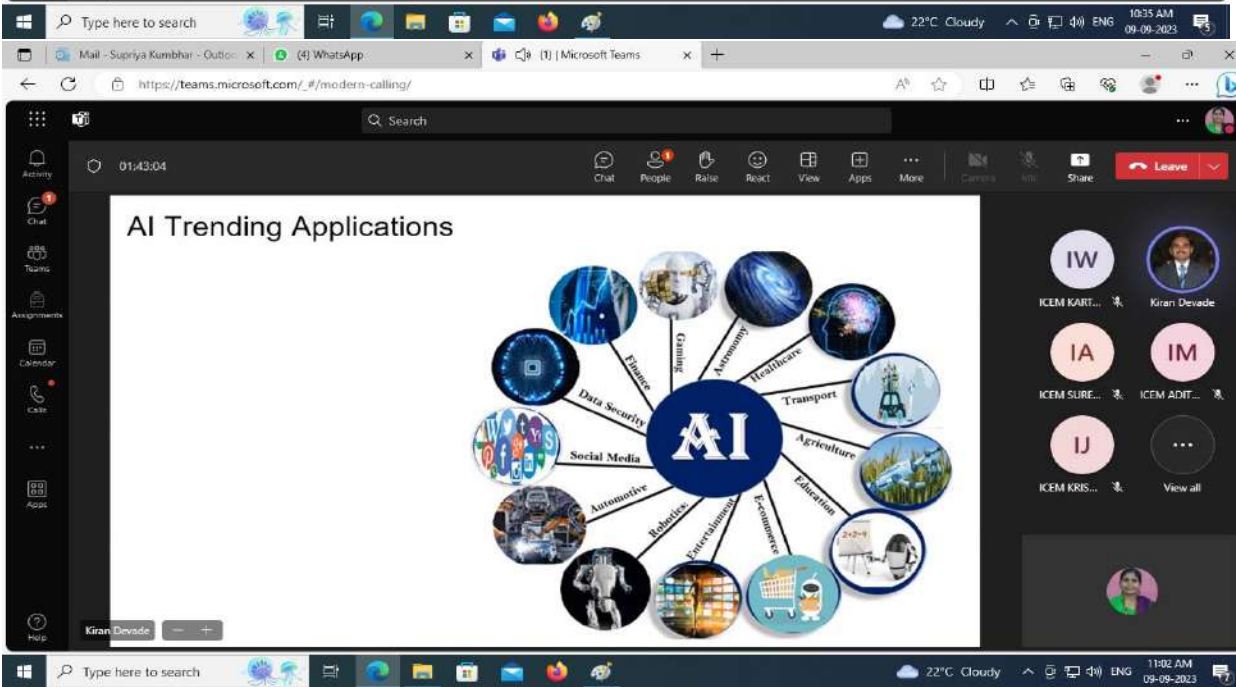

As a part of the Scope of Artificial Intelligence in different subjects, the FE department has started the conduction of sessions on its scope with live examples and case studies of AI. In the eve of the session start Dr. Kiran Sir was conducted a beautiful session with a history of Artificial Intelligence and the founder of AI explained very well. Sir also talked on the story of “Myth of Pygmalion and Galatea”, NLP in AI, etc.

Few Glimpses:

The screenshot shows a Microsoft Teams meeting interface. The main content area displays a slide about John McCarthy, the 'Father of AI'. The slide includes a black and white photograph of McCarthy at a computer terminal and a list of his contributions: American Scientist, 1956, LISP Language, and Fortran. The right-hand side of the screen shows a grid of participant avatars, including Kiran Devade, ICEM KRIS..., ICEM SURE..., ICEM ADIT..., Sujit (Guest), and a 'View all' button. The top navigation bar contains icons for Chat, People, Raise, React, View, Apps, More, Camera, Mic, and Share, along with a 'Leave' button. The bottom status bar shows the time as 01:16:34 and the user name Kiran Devade.

The screenshot shows a Microsoft Teams meeting interface. The main content area displays a slide titled 'AI Trending Applications'. The slide features a central 'AI' logo surrounded by various application areas: Finance, Gaming, Astronomy, Healthcare, Transport, Agriculture, Education, E-commerce, Robotics, Entertainment, Automotive, Social Media, and Data Security. The right-hand side of the screen shows a grid of participant avatars, including Kiran Devade, ICEM KART..., ICEM SURE..., ICEM ADIT..., ICEM KRIS..., and a 'View all' button. The top navigation bar contains icons for Chat, People, Raise, React, View, Apps, More, Camera, Mic, and Share, along with a 'Leave' button. The bottom status bar shows the time as 01:43:04 and the user name Kiran Devade.

Date: 9th Sept 2023

Notice

All Students of BE are hereby informed that 30hrs Certification Course under VAC (Value Added Course) on Advanced Python is scheduled from 11th to 15th Sept 2023. Therefore, all should have to attend compulsory otherwise strict action will be taken if your attendance is not 100%.

The details are as follows.

Date: 11th to 15th September 2023

Time: 10:00 AM-5:00 PM

Mode: Offline

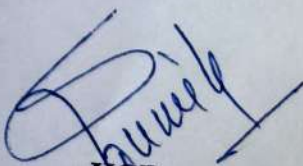

Venue: CKP hall, 4th Floor Computer Engineering

Note:

- Attendance is Compulsory otherwise Rs.500 should be fine per day.
- Uniform and ID Card is Mandatory.

VAP Coordinator
Prof. Reshma Kohad

HOD
Dr. Soumitra Das

Savitribai Phule Pune University
Third Year of Computer Engineering (2019 Course)
Value Addition Program

Teaching Scheme: Course: Advanced Python(TE)

Prerequisite Courses: basics python library and function knowledge is essential
basic understanding of data analysis is required

Course Objectives:

- To Explore the latest Visualization and data Manipulation Concept.
- To Familiarize with the core concepts of frontend and backend programming.
- To Explore the latest libraries using advance program.

Course Outcomes:

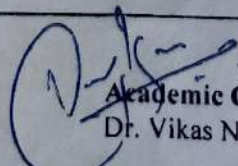

After learning the course, students will be able to:

- Implement different Libraries for functions analyzing and manipulating.
- Explore the latest features of Numpy, Pandas & other Libraries.
- Implement data visualization and Module Building.

Detailed Syllabus

UNIT	Description	Duration (Hr)
I	Introduction to Python: Basics of Python, Installation Process , different Function, Overview of libraries, Standard Modules & Packages in python	06
II	Implementation of Seaborn Library Introduction of seaborn, Installation of seaborn library, overview of seaborn plotting function, seaborn object, properties. Styling and Themes in Seaborn Plotting chart using different function. Case study: Design plot graph of Height and Weight	08
III	Implementation of Numpy and Panda Library : Introduction of Numpy & Pandas Library, Installation Process, Handling Data Structure using Numpy, Data Frames Using Pandas Data Manipulation using Numpy and Pandas Case Study :	08
IV	Introduction of Scikit-learn and Matplotlib Library: <ul style="list-style-type: none"> • Overview of scikit Library, Installation of scikit, features of scikit, Model Processing, data representation, Implementation of Linear Modelling. Overview of Matplotlib Library, Installation of Matplotlib, Library, Plotting Section in Matplotlib. Implementation of Example using Matplotlib Library Case study: i) Estimate API using linear Regression ii) How to Plot List of X, Y Coordinates in Matplotlib	08

Event Report

Academic Year: 2023-24

Semester-I

Name of the event: Five days Workshop on "Learning Advance Python with Hands-on Practice"

Date and Time	11/09/2023 to 15/09/2023, 10.00 AM - 05.00 PM
Event Venue	Indira College of Engineering and Management, Parandwadi, Pune
Organized by	Department of Computer Engineering
Targeted Audience	T.E. Students of ICEM, Parandwadi, Pune
Resource Person	Prof. Tushar Kute, MITU Skillologies, Pune, India

Event Contents:

1. Understanding the concepts of Advance Python.
2. Hands-on practice on Advance Python.

Details of the event:

The Department of Computer Engineering of ICEM, Parandwadi, has organized a five days Workshop on "Learning Advance Python with Hands-on Practice" from 11th September 2023 to 15th September 2023 by inviting an eminent guest to deliver sessions on concepts of Advance Python.

The session speaker **Prof. Tushar Kute** had a nice talk on the basic understanding and the concepts of Data structures, Datasets, and programming with real time examples.

Day	Topics covered
Day 1	Python Basics and Data Structures Python syntax and essential concepts. Data structures: list, tuple, set, and dictionary. Introduction to linear algebra and linear regression.
Day 2	Numpy and Pandas

	<p>In-depth study of Numpy for numerical computing.</p> <p>Comprehensive understanding of Pandas for data manipulation.</p>
Day 3	<p>Advanced Pandas Techniques</p> <p>Utilized Pandas for data appending, concatenation, merging, and joining.</p> <p>Explored string functions, data export, cleaning, and scaling.</p>
Day 4	<p>Data Visualization with Matplotlib</p> <p>Data visualization with Matplotlib.</p> <p>Various plots, including line plots.</p>
Day 5	<p>Tkinter, Machine Learning, and Regression</p> <p>Tkinter for building graphical user interfaces.</p> <p>Introduction to machine learning concepts.</p> <p>Classification, regression, and unsupervised learning.</p> <p>Regression Analysis</p> <p>Regression analysis as a statistical method for understanding relationships between variables.</p> <p>Importance of dependent and independent variables.</p> <p>Practical application of linear regression.</p> <p>Data preprocessing techniques like feature scaling and cleaning.</p> <p>Basics of classification algorithms.</p> <p>Introduction to unsupervised learning and clustering.</p>

He had a very interactive session with the students and it was an effective two-way communication of the speaker and the participants.

Introduction to Training Topics

Welcome to our upcoming training program, where we will embark on an exciting journey into the world of Civil Engineering and the powerful tools it encompasses. Over the course of four intensive days, we will dive deep into key topics designed to equip you with practical knowledge and skills that are essential in today's dynamic Civil Engineering landscape.

By the end of these Five days(30 Hr), Students not only have gained a profound understanding of these crucial topics but also practical skills that can propel your career in Civil Engineering forward. We encourage active participation, open dialogue, and hands-on learning throughout the program.

So, let's embark on this knowledge-packed journey together. Get ready to explore, learn, and grow as we dive into the world of Civil Engineering, BIM, Revit, and the exciting possibilities of Artificial Intelligence. Let's make the most of this opportunity to enhance our skills and stay at the forefront of innovation in the industry.

Technical Week		
Course Content		
Days	Topics	Hrs
Day 1	Mindset of civil student and Industry requirement	6
	Overview of Building Information Modeling (BIM) and its importance	
	Overview of Revit and its benefits Test 1	
	Artificial intelligence & Civil Industry	
	Basics of Revit	
	Understanding the Interface	
	Navigating the Revit interface, including the Ribbon, Properties panel, and Project browser	
	Customizing the interface and general options, Navigation, Zooming, panning, and rotating the view"	

Day 2	Project 1: Simple House	6
	Setting up a project	
	Creating levels and walls	
	Selecting objects and using filters	
	Adding floors, doors, windows,	
Day 3	adding components	6
	Adding families downloading families	
	stairs, and railing	
Day 4	Section	6
	Camera	
	walkthrough	
Day 5	Rendering	6
	Sheets	
	LinkedIn profile with respect to Civil Engineer	
	Role Artificial intelligence in Civil Engineering and how to Prepre for new era of A.I. as a Civil Engineer	
	Test

**Report on 30 Hrs.
"Advance Java Certification Course"**

Date: 11/03/2024 to 15/03/2024

Participants: FYMCA students

Venue: FYMCA Classroom

Trainer: Mr. Sachin Lohar – Freelance Corporate Trainer

Brief Description:

The Advance Java Certification Program for FY MCA students was conducted in the MCA Department from 11/03/2024 to 15/03/2024. The program aimed to provide students with in-depth knowledge and practical experience in various Advance Java Programming topics.

Throughout the five sessions, the students were exposed to essential of Advance Java Programming. Each session included both theoretical explanations and hands-on exercises to reinforce learning.

Which also covers the following topics in details with hands on training

SN	Module	Sub Topics
1	Advance JA-VA	Introduction to java
		Exception Handling
		Collection framework
		Database programming with JDBC
2	Spring	Spring Core Basics
		Spring Introduction
		Spring Architecture
		Spring Environment Setup
		Spring Example
		Spring IoC Containers
		Spring - Bean Definition
		Spring - Bean Scopes
		Spring Bean Life Cycle
		Spring Bean Post Processors

3	Hibernate	Spring Dependency Injection
		Hibernate Introduction
		Hibernate Architecture
		Hibernate and Java Persistence API (JPA)
		Hibernate Project Dependencies
		Domain Model Classes
		Hibernate Mapping XML Configuration
		Hibernate Configuration Files
		Hibernate Session Factory
		Hibernate Annotation
		4
Selenium WebDriver		
WebDriver Vs RC WebDriver		
Installation First Test Case WebDriver		
Commands Running Test on Chrome Running Test on Firefox Running		
Drop-Downs WebDriver-		
Drag and Drop WebDriver-		
a Web Page WebDriver - Browser Commands Web-Driver –		
Navigation Commands WebDriver –		
Web Element Commands Handling		
Radio Buttons Handling Checkbox Selenium		

Finally, the students learned about the Advance Java using above topics and a small project is assigned to them.

The students actively participated in the sessions, and their progress was assessed through

Practical assignments and quizzes. At the end of the program, each student received a certification of completion, acknowledging their dedication and successful completion of the Advance Java Certification Program.

- Market Research
- Keyword Research And Analysis
- Types Of Keywords
- Tools Used For Keyword Research
- Localized Keyword Research
- Competitor Website Keyword Analysis
- Choosing Right Keywords To The Project

MODULE 3: SEARCH ENGINE OPTIMIZATION (SEO)

- Introduction To Search Engine Optimization
- How Did Search Engine work?
- SEO Fundamentals & Concepts
- Understanding the SERP
- Google Processing
- Indexing
- Crawling

MODULE 4: ON-PAGE OPTIMIZATION

- Domain Selection
- Hosting Selection
- Meta Data Optimization
- URL Optimization
- Internal Linking
- 301 Redirection
- 404 Error Pages

Syllabus

MODULE 1: BASICS of DIGITAL MARKETING

- Introduction To Online Digital Marketing
- Importance Of Digital Marketing
- How did Internet Marketing work?
- Traditional Vs. Digital Marketing
- Types of Digital Marketing
- Increasing Visibility
- Visitors' Engagement
- Bringing Targeted Traffic
- Lead Generation

MODULE 2: ANALYSIS AND KEYWORD RESEARCH

- Market Research
- Keyword Research And Analysis
- Types Of Keywords
- Tools Used For Keyword Research
- Localized Keyword Research
- Competitor Website Keyword Analysis
- Choosing Right Keywords To The Project

MODULE 3: SEARCH ENGINE OPTIMIZATION (SEO)

- Introduction To Search Engine Optimization
- How Did Search Engine work?
- SEO Fundamentals & Concepts
- Understanding the SERP
- Google Processing
- Indexing
- Crawling

MODULE 4: ON-PAGE OPTIMIZATION

- Domain Selection
- Hosting Selection
- Meta Data Optimization
- URL Optimization
- Internal Linking
- 301 Redirection
- 404 Error Pages

- Canonical Implementation
- H1, H2, H3 Tags Optimization
- Image Optimization

MODULE 5: OFF-PAGE OPTIMIZATION

- Link Building Tips & Techniques
- Difference Between White Hat And Black Hat SEO
- Link Acquisition Techniques
- Directory Submission
- Social Bookmarking Submission
- Search Engine Submission
- Web 2.0 Submission
- Article Submission
- Image Submission
- Video Submission
- Forum Submission
- PPT Submission
- PDF Submission
- Classified Submission
- Business Listing
- Blog Commenting
- Citations
- Profile link creations
- Infographics Submission

MODULE 6: SEO UPDATES AND ANALYSIS

- Google Panda,
- Penguin,
- Humming Bird Algorithm
- Google Penalties
- SEO Tools For Website Analysis And Optimization
- Competitor Website Analysis And Backlinks Building
- Backlinks Tracking, Monitoring, And Reporting

MODULE 7: LOCAL BUSINESS & GOOGLE MAPPING

- Creating Local Listing In Search Engine
- Google Places Setup (Including Images, Videos, Map Etc)
- Search Engine Visibility Reports
- Verification Of Listing

- Google Reviews

MODULE 8: GOOGLE ADWORDS OR PAY PER CLICK MARKETING (SEM)

- Google Adwords
- Introduction To Online Advertising And Adwords
- Adwords Account And Campaign Basics
- Adwords Targeting And Placement
- Adwords Bidding And Budgeting
- Adwords Tools
- Opportunities
- Optimizing Performance
- Ads Type
- Bidding Strategies
- Search Network
- Display Network
- Shopping Ads
- Video Ads
- Universal App Ads
- Tracking Script
- Remarketing
- Performance Monitoring
- Reports

MODULE 9: SOCIAL MEDIA OPTIMIZATION (SMO)

- Social Media Optimization
- Introduction To Social Media Networks
- Types Of Social Media Websites
- Social Media Optimization Concepts
- Facebook, Google+, LinkedIn,
- YouTube, Pinterest,
- Hashtags
- Image Optimization

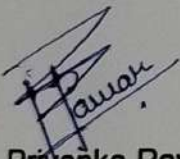

MODULE 10: GOOGLE WEB ANALYTICS

- Getting Started With Google Analytics
- Navigating Google Analytics
- Audience
- Acquisition
- Traffic Sources

- Behavior
- Content
- Visitors
- Live Data
- Demographics

MODULE 11: CREATING A NEW SIMPLE WEBSITE

- Creating A Simple Website For Your Business

Date: 9/03/2024

Department of Artificial Intelligence and Data Science

Data Science Using Python Training Day wise Plan

Class: SE

Duration: 11th March to 15th March 2024

Day 1: Introduction to Data Science

On the first day of the program, participants will delve into the foundational concepts of data science, gaining insight into its applications and significance. The session will set the stage for an immersive exploration of this dynamic field.

Day 2: Data Collection and Preprocessing

1. Importance of Data Collection- Collecting relevant and accurate data is crucial for insightful analysis and informed decision-making.
2. Different Sources of Data- Data can be sourced from databases, surveys, social media, IoT devices, and more, each requiring different handling.
3. Data Preprocessing Techniques- Techniques like cleaning, transformation, and normalization are essential for preparing raw data for analysis.

Day 3: Exploratory Data Analysis

1. Data Exploration- Understanding the structure and content of the dataset through summarization and visualization.
2. Statistical Analysis- Utilizing statistical methods to identify patterns, trends, and correlations in the data.
3. Feature Selection- Identifying and selecting relevant features that contribute to predictive modeling and analysis.

Day 4: Machine Learning Algorithms

1. Introduction to machine learning- An overview of machine learning and its applications in data science.
2. Supervised and unsupervised learning- Understanding the differences between supervised and unsupervised learning methods.
3. Regression and classification algorithms- Exploring regression and classification algorithms for predictive modeling and pattern recognition.

Day 5: Advanced Topics in Data Science

1. Deep Learning and Neural Networks Explore advanced machine learning techniques like deep neural networks and their applications in data science.
2. Natural Language Processing Learn about processing and analyzing human language data using computational methods and algorithms.
3. Time Series Analysis Understand the analysis and prediction of time series data, essential for forecasting and trend identification

Bridge Course Report: Data Science Using Python

Date: 11th March to 15th March 2024

Venue: Classroom No. 19

Time: 10:30 am to 11:30 pm

Introduction: The Bridge Course on "Data Science Using Python" was conducted at the AI and DS Department from 11th March to 15th March 2024. The primary objective of the course was to provide foundational knowledge and hands-on experience in Python programming and its application in data science.

Course Structure: The course was designed to cover essential concepts in Python programming and data science, catering to participants with varying levels of expertise. It consisted of lectures, practical sessions, and assignments, ensuring a balanced mix of theoretical understanding and practical implementation.

Key Topics Covered:

1. Introduction to Python Programming: Basics of Python syntax, data types, control flow statements, functions, and modules.
2. Data Manipulation with Pandas: Data structures, data cleaning, manipulation, and analysis using the Pandas library.
3. Data Visualization: Plotting various types of graphs and visualizations to explore and communicate insights from data.
4. Introduction to Machine Learning: Overview of machine learning concepts, algorithms, and their implementation using libraries.
5. Hands-on Projects: Participants worked on real-world datasets to apply the concepts learned during the course, reinforcing their understanding through practical application.

Course Delivery:

- Lectures: Interactive session led by experienced instructor by Mr. Shaik Abdul Hafeez, provided a comprehensive understanding of the theoretical concepts.
- Practical Sessions: Hands-on exercises allowed participants to apply Python programming and data science techniques in a guided environment.
- Assignments: Regular assignments encouraged participants to practice and reinforce their learning outside of the classroom.
- Project Work: Participants collaborated on projects, applying their knowledge to solve practical data science problems.

Participant Feedback: Feedback from participants was overwhelmingly positive, with many expressing appreciations for the well-structured curriculum and the hands-on approach. Participants particularly enjoyed the opportunity to work on real-world projects, which enhanced their practical skills and confidence in applying data science techniques.

Conclusion: The Bridge Course on "Data Science Using Python" provided participants with a solid foundation in Python programming and its application in data science. By covering essential concepts and facilitating hands-on learning, the course equipped participants with the skills and knowledge necessary to embark on their journey in data science. The success of the course underscores the department's commitment to fostering excellence in AI and data science education.
